EDUCATION

Carnegie Mellon University Africa (CMU-Africa) 2026 - 2028

Master of Science in Information Technology (MSIT)

Adventist University of Central Africa (AUCA)

Bachelor of Science in Software Engineering

Relevant Coursework: OOP, Data Structures, Databases, System Design, Full-Stack Development, Software Project Management.

Capstone: Developed an IT system to support the implementation of Rwanda's school feeding policy, including features for data tracking, reporting, and monitoring, helping schools manage feeding programs efficiently.

Advisor: Dr. Pacifique Nizeyimana

Gashora Girls Academy of Science & Technology January 2019 - June 2022

High School Diploma | Grade: 4.0

EXPERIENCE

AUCA Innovation Center, Kigali — Full Stack Engineer August 2024 - July 2026

- Worked with Mastercard Foundation during the community outreach program, visiting 10 secondary schools across Rwanda to introduce students to Big Data.
- Built an IT system that supports Rwanda's school feeding policy by helping schools and communities track, monitor, and report on feeding programs more effectively.
- Developed a School Dropout Reduction System using attendance and performance analytics with automated alerts to support at-risk students.
- Gained hands-on experience in software development, database management, and user-centered design.

AUCA, Kigali — IT Campus Librarian January 2023 - January 2026

- Managed and maintained the library's digital resources to ensure smooth access for students and staff.
- Assisted students and faculty with research, database queries, and digital resource navigation.
- Implemented software and IT tools to improve library operations and automate routine tasks.
- Provided technical support for library systems, including troubleshooting access issues and maintaining data integrity.

Caystard Group Ltd, Remote — Software Developer Intern June 2025 - November 2025

- Designed and deployed 4+ critical features for high-traffic Android applications, primarily utilizing Kotlin, integrating RESTful APIs, and achieving 97% test coverage for responsive UI components.
- Conducted performance optimization that reduced app load time by 15% and successfully debugged complex modules, enhancing user experience for over 5,000 active users.

TheGYM, Kigali — Software Development Trainee November 2024 - December 2025

- Participating in a 12-month software development traineeship, working on real-world projects under the mentorship of international developers.

SKILLS

Languages & Programming: Java, JavaScript, TypeScript, Python, C, SQL, R, C#

Backend & Frameworks: Node.js, Spring Boot, Firebase, Django

Data Science: Data Wrangling & Cleaning, Data Visualization, Exploratory Data Analysis, Feature Engineering, Supervised & Unsupervised Machine Learning, Ensemble Modeling

Mobile Development: Flutter, React Native

Software Engineering: Data Structures, API Design & Integration, CI/CD, Agile & Scrum

Tools & Platforms: Git, VS Code Debugger, Postman, Docker, AWS, Render/Netlify/Heroku

Testing: JUnit, Postman, Unit Testing, API Testing

LANGUAGES

Kinyarwanda, English

PROJECTS

IoT-Based Flood Alert System 2023

- Developed a hybrid model using graphs in algorithms like Dijkstra's Algorithm and priority queues to process sensor data, achieving a real-time alert latency of less than 10 seconds.
- Built an end-to-end IoT system utilizing Arduino/Raspberry Pi microcontrollers and Python for data processing. Successfully deployed and tested 3 sensor units in the Ngororero and Musanze districts.
- Presented my work at Hanga Pitchfest 2023.

School Feeding System | GitHub Repo — AUCA Innovation Center 2025

- Developing a full-stack software using Spring Boot with Java to track meal distribution by automating reporting across public schools, enhancing resource management efficiency.
- Awarded 2nd place in the AUCA Innovation Center Hackathon for innovative educational impact.

Escrow Chain Alliance | GitHub Repo — Cardano Hackathon | Umurava 2025

- Developed a full-stack blockchain-based rental management platform using React, Node.js, and Cardano smart contracts.
- Implemented secure escrow payments, decentralized dispute resolution, and role-based dashboards for tenants, landlords, and admins.

VOLUNTEERING

Rwanda Computing Olympiad — Data Structures Coach 2023 - Present

- Guiding students through algorithms and competitive programming challenges.

Idebate Rwanda — Public Speaking Coach 2022 - 2023

- Coached secondary school students in public speaking, debate structure, and critical thinking.
- Mentored students to improve confidence, clarity, and persuasive communication in competitive and academic settings.
- Facilitated public speaking and leadership training sessions for youth during a summer camp program.

CERTIFICATES

- Applied Data Science Lab - WorldQuant University
- Safeguarding Essentials - Humanitarian Leadership Academy
- Data Analysis with Python - freeCodeCamp
- Mobile App Development - Technovation
- Networking Essentials - CISCO
- Python Core - Sololearn
- Introduction to Kubernetes - The Linux Foundation
